

TO WHOMSOEVER IT MAY CONCERN

The KPIT Board of Directors have been using BoardEye as pre-read tool for Agenda, Notes to agenda and Presentations for over 3 years now. Although, most of our Directors are using BoardEye on iPad, it is also compatible and running smoothly on Windows and Android. We have found this software user friendly and would also like to appreciate Axar Team for their "Ready to Help" attitude to all the Directors whenever needed and even on short notice. All the statutory timelines with respect to Board Meetings are included in BoardEye and can be referred at any time. BoardEye also takes care of data security concern and maintains secrecy for all the documents uploaded through this application. BoardEye definitely provides great return on investment year on year. One, who intends to digitize their board processes definitely can consider Axar Digital's BoardEye.
